Notice to Past Authors of ACM-Published Articles

ACM intends to create a complete electronic archive of all articles and/or other material previously published by ACM. If you have written a work that was previously published by ACM in any journal or conference proceedings prior to 1978, or any SIG Newsletter at any time, and you do NOT want this work to appear in the ACM Digital Library, please inform permissions@acm.org, stating the title of the work, the author(s), and where and when published.

If you have any questions concerning this statement, please contact permissions@acm.org, as well.

Editorial Philosophy

The DATABASE for Advances in Information Systems is the quarterly publication of the Special Interest Group on Management Information Systems of the Association for Computing Machinery (ACM-SIGMIS). The publication is the primary vehicle of communication to the membership, presenting articles of practical research significance and relating experiences in the area of the business uses of information systems. We seek to provide an accessible, flexible, and timely forum for information on both well-researched topics and those less common, perhaps leading-edge, topics which may not yet have found their way into the literature. We welcome the opportunity to publish materials that are controversial or which may as yet be untested.

Submissions

One electronic copy of your completed manuscript should be uploaded to the Data Base online editorial portal at

<http://www.editorialmanager.com/sigmisdb/>

Questions about manuscript preparation and suitability can be directed to the DataBase Managing Editor, Andrew Schwarz, aschwarz@lsu.edu.

Manuscript Format

All manuscripts should be typed, letter quality, and double-spaced on one side of the paper. Type should be dark. If the paper has been presented previously at a professional meeting, this should be noted with other acknowledgments and funding sources on a separate page at the end of the paper. The following information should be included:

1. Author's name(s) and complete mailing address, phone number, fax number, Internet e-mail address, and a short (no more than 100 words) biographical sketch on a separate page
2. Abstract (200-300 words)
3. Keywords or phrases for indexing (up to 15)
4. ACM categories from the schedule used by the Communications of the ACM. See <http://www.acm.org/class>

Citations

Bibliographic references in the body of the text should be formatted as follows: (author name[s], year). Entries in the References should be ordered alphabetically according to authors' or editors' names. Journal references should take

the form: Author last name, initials. (Year). "Title," Journal, Vol., No., pages. Book and report references should take the form: Author last name, initials. (Year). Title, publisher city: publisher name, pages, if applicable. Conference proceedings should take the form: Author last name, initials. (Year). "Title," Proceedings name, conference location, pages.

The Review Process

Articles are screened by the Editors and then assigned to an appropriate Senior Editor. Manuscripts are then sent to up to five reviewers. When the reviews are completed, the manuscript will be accepted, rejected, or revisions will be requested under the supervision of the Senior Editor. If minor revisions are requested, the manuscript will be examined by the Editors. Major revisions may lead to a full second, third, or fourth review.

The review process takes approximately four to five months from receipt of manuscript to an initial decision. Authors will be informed of the status of their manuscripts as they pass through the various stages.

Notice to Contributing Authors to SIG Publications:

By submitting your article for publication in this Special Interest Group publication, you hereby grant to ACM the following non-exclusive, perpetual, worldwide rights:

- to publish in print on condition of acceptance by the editor
- to digitize and post your article in the electronic version of this publication
- to include the article in the ACM Digital Library
- to allow users to copy and distribute the article for noncommercial, educational, or research purposes

However, as a contributing author, you retain copyright to your article and ACM will make every effort to refer requests for commercial use directly to you.
