Welcome to the 12th International Conference on Predictive Models and Data Analytics in Software Engineering (PROMISE 2016)

It is our pleasure to welcome you to the 12th International Conference on Predictive Models and Data Analytics in Software Engineering (PROMISE 2016), to be held in Ciudad Real, Spain, on September 7, 2016, co-located with the 10th International Symposium on Empirical Software Engineering and Measurement (ESEM 2016).

PROMISE is an annual forum for researchers and practitioners to present, discuss and exchange ideas, results, expertise and experiences in construction and/or application of predictive models and data analytics in software engineering. Such models and analyses could be targeted at: planning, design, implementation, testing, maintenance, quality assurance, evaluation, process improvement, management, decision making, and risk assessment in software and systems development.

PROMISE is distinguished from similar forums with its public data repository and focus on methodological details, providing a unique interdisciplinary venue for software engineering and data mining communities, and seeking for verifiable and repeatable experiments that are useful in practice.

This year PROMISE received a total of 23 paper submissions. After a reviewing process, in which each paper has been reviewed by at least three members of the program committee, and in which an online discussion was held, we accepted a total of 10 papers (3 short papers and 7 full papers), which will be presented in 4 technical sessions. The acceptance criteria were entirely based on the quality of the papers, without imposing any constraint on the number of papers to be accepted.

We are delighted to announce an outstanding keynote that will be delivered by Prof. Natalia Juristo from Technical University of Madrid, Spain. Her keynote will be about "Use and Misuse of the term experiment in the software repositories research".

We would like to thank all authors for submitting high quality papers, and program committee members as well as external reviewers for their timely and accurate reviewing activity. Last, but not least, we would like to thank the ESEM 2016 organizers for hosting PROMISE 2016 as a co-located event and for their logistic support in the organization of the conference.

We hope you will enjoy PROMISE 2016. We certainly will!

The PROMISE 2016 Organization and Steering Committee: Ayse Bener, Leandro Minku, Andriy Miranskyy, Massimiliano Di Penta, Daniel Rodriguez, Burak Turhan, Hongyu Zhang

PROMISE 2016 Team

General Chair:

Ayse Bener, Ryerson University, Canada

PC Chairs:

Andriy Miranskyy, *Ryerson University, Canada* Hongyu Zhang, *Microsoft Research, China*

Publicity Chair:

Leandro Minku, University of Leicester, UK

Publication Chair: Massimiliano Di Penta, University of Sannio, Italy

Local Organization Co-Chairs:

Burak Turhan, University of Oulu, Finland Daniel Rodriguez, University of Alcalá, Spain

Programme Committee:

Lefteris Angelis, Aristotle University of Thessaloniki, Greece Gabriele Bavota, Free University of Bozen-Bolzano, Italy Bora Caglayan, LERO, Ireland Burak Turhan, University of Oulu, Finland Massimiliano Di Penta, University of Sannio, Italy Thomas Fritz, University of Zurich, Switzerland Tracy Hall, Brunel University, UK Rachel Harrison, Oxford Brookes University, UK Jacky Keung, City University of Hong Kong Foutse Khomh, DGIGL École Polytechnique de Montréal, Canada Ekrem Kocaguneli, Microsoft, USA Chris Lokan, University of New South Wales, UK Lech Madeyski, Wroclaw University of Technology, Poland Emilia Mendes, BTH & University of Oulu, Finland Tim Menzies, North Carolina State University, USA Leandro Minku, University of Leicester, UK Rudolf Ramler, Software Competence Center, Germany Daniel Rodriguez, The University of Alcalá, Spain Federica Sarro, University College London, UK Martin Shepperd, Brunel University, UK Ayse Tosun Misirli, Istanbul Technical University, Turkey

Stefan Wagner, *University of Stuttgart, Germany* Hironori Washizaki, *Waseda University, Japan* Dietmar Winkler, *Vienna University of Technology, Austria* Yang Ye, Stevens *Institute of Technology, uSA* Yuming Zhou, *Nanjing University, China*

Co-Reviewers:

Tamer Abdou, *Ryerson University, Canada* Shirin Akbarinasaji, *Ryerson University, Canada* Verena Käfer, *University of Stuttgart, Germany* Rainer Niedermayr, *CQSE, Germany* Behjat Soltanifar, *Ryerson University, Canada*

PROMISE 2016 - Table of Contents

- 1. Forecasting Communication Behavior in Student Software Projects. Jil Klünder, Oliver Karras, Fabian Kortum and Kurt Schneider.
- 2. Estimating Story Points from Issue Reports. Simone Porru, Alessandro Murgia, Serge Demeyer, Michele Marchesi and Roberto Tonelli.
- 3. Search Based Training Data Selection For Cross Project Defect Prediction. Seyedrebvar Hosseini, Burak Turhan and Mika Mäntylä.
- 4. On the Terms Within- and Cross-Company in Software Effort Estimation. *Leandro Minku.*
- 5. Measuring the Stylistic Inconsistency in Software Projects using Hierarchical Agglomerative Clustering. *Qing Mi, Jacky Keung and Yang Yu.*
- 6. An Empirical Evaluation of Distribution-based Thresholds for Internal Software Measures. *Luigi Lavazza and Sandro Morasca.*
- 7. Data Sets and Data Quality in Software Engineering: Eight Years On. *Gernot Liebchen and Martin Shepperd.*
- Hidden Markov Models for the Prediction of Developer Involvement Dynamics and Workload.
 Verena Honsel, Steffen Herbold and Jens Grabowski.
- 9. Predicting the Popularity of GitHub Repositories. Hudson Borges, Andre Hora and Marco Tulio Valente.
- 10. A Manually Validated Code Refactoring Dataset and Its Assessment Regarding Software Maintainability. István Kádár, Péter Hegedűs, Rudolf Ferenc and Tibor Gyimóthy.
